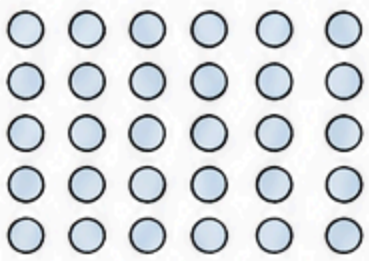
Division Picture Problems with Arrays

Year 6

Name: _____ Date: _____

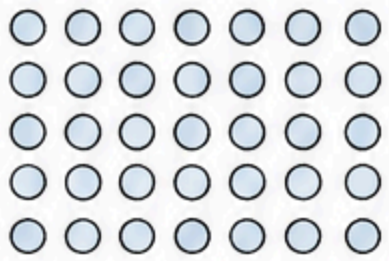
Look at each array. Write the division equation and answer for the array.

1. The array shows 24 counters shared equally into 6 groups. What is the division equation and the answer?



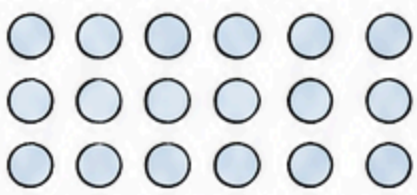
_____ ÷ _____ = _____

2. The array shows 35 counters shared equally into 7 groups. What is the division equation and the answer?



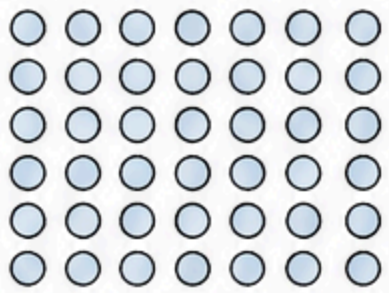
_____ ÷ _____ = _____

3. The array shows 18 counters shared equally into 3 groups. What is the division equation and the answer?



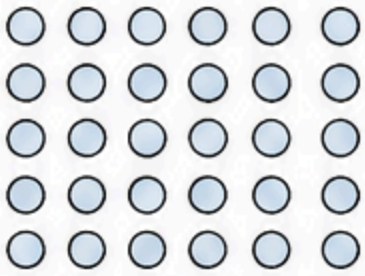
_____ ÷ _____ = _____

4. The array shows 42 counters shared equally into 6 groups. What is the division equation and the answer?



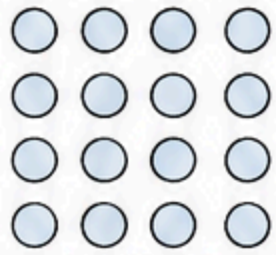
_____ ÷ _____ = _____

5. The array shows 30 counters shared equally into 5 groups. What is the division equation and the answer?



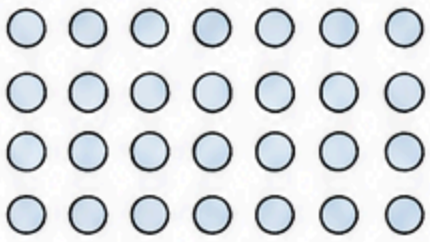
_____ ÷ _____ = _____

6. The array shows 16 counters shared equally into 4 groups. What is the division equation and the answer?



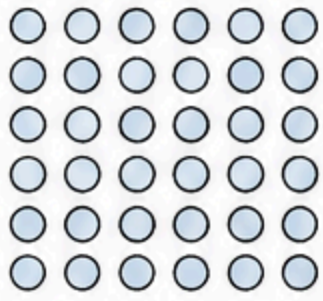
_____ ÷ _____ = _____

7. The array shows 28 counters shared equally into 7 groups. What is the division equation and the answer?



_____ ÷ _____ = _____

8. The array shows 36 counters shared equally into 9 groups. What is the division equation and the answer?



_____ ÷ _____ = _____
