

# Dividing Large Numbers with Zeros

Name: \_\_\_\_\_

Date: \_\_\_\_\_

---

**Instructions:** Solve each division problem using long division. Show your working out. Remember to include zeros as placeholders when needed.

**1.  $4,824 \div 4 =$  \_\_\_\_\_**

Working:

**2.  $6,036 \div 6 =$  \_\_\_\_\_**

Working:

**3.  $8,040 \div 8 =$  \_\_\_\_\_**

Working:

**4.  $5,050 \div 5 =$  \_\_\_\_\_**

Working:

**5.  $7,210 \div 7 =$  \_\_\_\_\_**

Working:

**6.  $9,027 \div 9 =$  \_\_\_\_\_**

Working:

**7.  $12,048 \div 12 =$  \_\_\_\_\_**

Working:

**8.  $15,060 \div 15 =$  \_\_\_\_\_**

Working:

**Challenge Problem:**

9. A factory produces 20,080 bottles in 20 days. If they produce the same number each day, how many bottles do they produce per day?

Answer: \_\_\_\_\_ bottles per day
